

- design EN 13709
- straight cast body
- wedled seat
- rising stem with outside screw and yoke
- asbestos-free packing

APPLICATION

- water or steam distribution
- cooling systems
- petrochemical or chemical industry

ADVANTAGES

- compliance of emission standards
- easy installation and maintenance
- long service life

TECHNICAL DATA

Working range: water, steam, natural gas, oil, petroleum derivates and another non-aggressive working fluids; temperature range from -10 °C to +400 °C

The allowable pressure/temperature rating acc. to EN 12516:

Nominal pressure	Material	Max. working pressure (bar) – Temperature (°C)						
		100 °C	150 °C	200 °C	250 °C	300 °C	350 °C	400 °C
PN 40	GP240GH	37,1	35,2	33,3	30,4	27,6	25,7	23,8

Construction materials: carbon steel (pls see more in table of materials of main parts)

Face to face: EN 558-1, serie 1

Flanges: EN 1092-1, B1/ DIN PN40

Straight globe valves have a flow direction of the working fluid equal to the direction of the arrow on the body and are designed to operate in the OPEN or CLOSED position. They are not suitable for flow control in the basic version.

Operating: hand wheel

Options: hand wheel with lock
hand wheel with limit switches
operating by electric actuator
other types of coatings according to customer requirements
delivery including counter-flanges, bolting and sealing material

Testing: each globe valve is tested according to EN 12266 and supplied with accompanying documentation according to EN 10204

Certification: PED 2014/68/ EU

DESIGN AND CONSTRUCTION MATERIALS
